

# The Twenty-Third IEEE Symposium on Logic In Computer Science 2008 Call for Workshop Proposals

The Twenty-Third IEEE Symposium on Logic In Computer Science (LICS 2008) (<http://www2.informatik.hu-berlin.de/lics/lics08> ) will be held in Pittsburgh, Pennsylvania (USA) June 24–27. It will be colocated with CSF (IEEE Computer Security Foundations). Possible dates for workshops are June 21–23, 2008 (i.e. up to three days before LICS).

Researchers and practitioners are invited to submit proposals for workshops on topics relating logic - broadly construed - to computer science or related fields. Typically, LICS workshops feature a number of invited speakers and a smaller number of contributed presentations. LICS workshops do not produce formal proceedings. However, in the past there have been special issues of journals based in part on certain LICS workshops.

Proposals should include:

- A short scientific summary and justification of the proposed topic. This should include a discussion of the particular benefits of the topic to the LICS community.
- A discussion of the proposed format and agenda.
- The proposed duration, which is typically one to two days, and your preferred dates. (This is important!)
- Let us know if you would like your workshop to be a joint workshop with CSF.
- Procedures for selecting participants and papers.
- Expected number of participants. (This is important!)
- Potential invited speakers.
- Plans for dissemination (for example, special issues of journals).

Proposals are due Nov. 20, 2007 and should be submitted electronically to both of us:
